## Wi-Fi Multi-Plug

### User Manual

US

The devices are not intended for use in location where the temperature may be less than actual room conditions, such as unheated warehouses or garages.

Works with Amazon Alexa

Ver :PP1705XN -A

Compatible with any smart phone, including Android devices, iPod, iPhone, iPad running Android or iOS.

Download and install the Xenon Smart app for either iOS or Android.

Android

iOS

Once downloaded, the app will ask you to register your device. Enter your cell phone number or email and select country and you will receive a text with the registration code.

Input the Registration Code you received via text and proceed to login.

#### Adding a New Device in Quick Connection

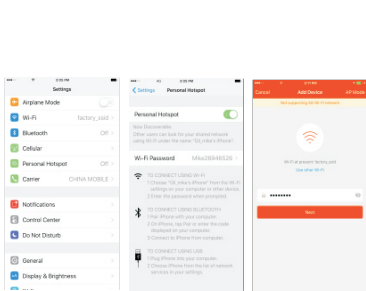

\* Make sure the multi-plug is standby (the blue light button flash in 2 times per second) after plug in the socket.  
Otherwise, you should press the power button keep to 6 seconds to reset the multi-plug.  
The multi-plug only supports 2.4GHz Wi-Fi router.

- \* Open app and click “+” to add device.
- \* Select WiFi network, input WiFi password, Connect and click.
- \* Once connected the app will prompt the connection> click OK

#### Adding a New Device in AP Mode

- \* Make sure the multi-plug is standby (the blue light button flash in 2 times per second) after plug in the socket.
- \* Press “+” in the main menu of app
- \* Click “AP Mode” and press Next Step in Add Device
- \* Select WiFi and input WiFi password, press Next in Set up Wi-Fi for device
- \* Press Connect now
- \* Go to WLAN setting in your smart phone and select the “SmartLife xxx” for your WiFi, no need to input password once you select the “SmartLifexxx” (you can directly to connect it if your OS is Android);
- \* Go back to app and press “Connect” Device name is “SmartLife xxx”,
- \* Confirm Device

#### Why failed to add device?

- \* Check routers or related:
- \* If router is dual-band router, select 2.4G network and add device. You also need to enable router's broadcasting function.
- \* Set up wireless router: Set encryption method as **WPA2-PSK** and authorization type as AES, or set both as auto. Wireless mode cannot be **11n only**.
- \* Don't use Chinese character to name router Wi-Fi.
- \* To stay strong Wi-Fi signal, please keep device and router within certain distance.
- \* Whether connected devices have reached the maximum number of router's connections. If so, please try by turning off the Wi-Fi connection of some device.
- \* Router's wireless MAC filtering function is enabled. Remove the device from the filter list and make sure that router is not prohibiting device from connection. Make sure the password entered in App is correct when adding new device
